

Founding Partner List – Skydatasol Ltd

Introduction

Skydatasol Ltd was established with the support of its founding partners, each of whom has played a critical role in shaping the strategic direction, financial foundation, and operational structure of the Group. This founding partner list records the individuals and entities who provided the initial capital, expertise, and governance oversight required to launch the Group and its subsidiaries.

The founding partners are recognised for their contribution to the development of the Group's long-term vision: building a diversified portfolio of businesses spanning security, engineering and construction, software development, cybersecurity (Kamiweb Project), oil and gas, renewable energy, logistics, and heavy manufacturing.

Founding Partners

1. Dr Francesco Dergano

Founder, Chief Executive Officer (CEO), and Chairman of the Board

Francesco Dergano is the principal founder and strategic architect of Skydatasol Ltd. He brings a background in security, engineering, software development, and political frameworks. His vision is to establish Skydatasol as a diversified holdings group with strong governance, a sustainable growth model, and a clear pathway toward institutional investment and eventual IPO.

2. Strategic Financial Backers

A group of private investors and early financial supporters who provided the seed capital for the formation of Skydatasol Ltd. Their role was instrumental in covering incorporation costs, legal structuring, and the first round of operational funding for subsidiaries. These backers retain founding shareholder status with ordinary shares and full voting rights.

3. Industry Advisors and Partners

A network of sector specialists in security, engineering, software, and energy who contributed expertise during the Group's inception. Their early input shaped the governance framework, subsidiary strategy, and compliance roadmap (including pursuit of ISO and Cyber Essentials certifications).

4. Technology and Innovation Partners

Collaborators responsible for early-stage development of the Kamiweb Project and Skydatasol Software Development division. Their input laid the groundwork for proprietary cybersecurity models and digital product development, positioning the Group for leadership in SaaS and secure digital authentication markets.

5. Institutional & Legal Advisors

Professional service providers, including solicitors and compliance consultants, who assisted with the Articles of Association, shareholder agreements, and corporate structuring. Their role ensures that the Group's legal foundation is aligned with the UK Companies Act 2006 and international investment standards.

Recognition of Contribution

The founding partners collectively embody the entrepreneurial, financial, and technical strength that underpins Skydatasol Ltd. They are recognised not only as equity holders but also as long-term stakeholders whose strategic support has created a foundation for expansion, diversification, and resilience.

The Group remains committed to protecting the rights of its founding partners, preserving their equity entitlements, and ensuring that their contributions are reflected in both governance and financial returns.
